MATERIAL CLASSIFIER SERIES

MC1400

- Four product separation solution for the waste and organics recycling industries
- Ideal solution for the cleaning of compost and biomass fractions
- Extract impurities from highly contaminated material in just one pass.
- Compact modular design - fits easily within an existing system
- Available as track, semi-trailer or static chassis formats
- Powered via a diesel/hydraulic powerunit, diesel genset or direct electric.
- Vacuum option can be disabled and closed off for applications where light plastics extraction is not required.
- Wide conveyors for even material spread
- Easy access for maintenance
- Fully enclosed - Eliminates dust
- Designed for quick and easy transportation via low-loader.
- Innovative "Sea-Can friendly" design for global export.

OPTIONS

- Static Electric
- Static C/W on-board Diesel Genset
- Tracked C/W on-board Diesel Genset
- Track Diesel/Hydraulic
- Semi-trailer
- Remote Tracking
- Central Auto-lube system
- Magnetic head-drums
- Secondary Vacuum Fan

APPLICATIONS

- Mulch
- Compost
- Biomass
- Construction & Demolition Waste
- RDF

FEATURES

- Heavy duty construction
- Fuel-efficient diesel Engine
- Easily adjustable components
- Wider conveyors for even material spread
- Zero spillage
- Fully enclosed to eliminate dust
- Easy access for maintenance

MATERIALS

- Lights (includes plastics and paper)
- Ferrous/Non Ferrous
- Stone
- Wood
- Compost
- Metals
