TRT620R SERIES

FEATURES & BENEFITS

The EDGE TRT620R tracked trommel has been designed for maximum productivity and superior screening efficiency. Thanks to 2m (6'9") X 5.5m (18') long drum and a screening area of 30m² (35.8yds²).

With a heavy duty construction design and high manoeuvrability, the TRT620R tracked trommel can cater for a wide range of applications, whether it is screening compost, mulch, soil, biomass or construction and demolition waste.

Impressive design features include an intelligent load management system that continually adjusts feeder speed for superior uptime and production capacity. The EDGE TRT620R has uniquely combined the ability to track and stack material simultaneously with an 180° Radial fines conveyor allowing for improved production and increased stockpile capacity. An innovative feeder design and drum swinging door allows the screening drum to be exchanged in the matter of minutes. The TRT620R also allows operators to take advantage of existing drum stock thanks to its ability to accept drums from other manufacturers.

Like all EDGE products, the EDGE TRT620R can be customised to meet the customers exact operation requirements.
